SUMMARY

Python Backend Developer with 2+ years building scalable REST APIs and microservices using **Django, DRF, and FastAPI**. Delivered production systems that reduced operational overhead ~40%, improved PostgreSQL query performance ~50%, and migrated legacy monoliths to microservices — across logistics and healthcare domains. Strong background in ORM tuning, CI/CD, and Agile delivery.

PROFESSIONAL EXPERIENCE

Aceassured — Python Backend Developer | Coimbatore, TN

May 2024 – Present

- Engineered **20+ production REST API endpoints** using Django & DRF; reduced data retrieval latency ~35% via endpoint-level caching and query batching strategies.
- Designed PostgreSQL schemas with composite & partial indexes and ORM-level tuning; achieved **~50% improvement** in query execution across high-volume transactional data.
- Replaced Excel-based workflows with a fully automated backend system, cutting **operational overhead ~40%** and eliminating manual data-entry errors for ops teams.
- Built payment & reporting modules with automated CSV/Excel exports — replaced **100% of manual spreadsheet processes** with audit-ready, compliance-traceable pipelines.
- Integrated third-party vendor APIs in Agile/Scrum sprints; shipped **5+ production features per quarter** consistently on schedule.

PROJECTS

Logistics Management System

2023 – 2024

Python • Django • DRF • FastAPI • PostgreSQL • Docker

- Migrated monolithic platform to Django/FastAPI microservices; reduced system downtime **~60%** and enabled horizontal scalability for projected **3× user growth**.
- Designed high-performance PostgreSQL data models with multi-column indexing; automated end-to-end payment reporting pipelines with zero manual intervention.

Repelta Healthcare — Campaign Management System

2023

Django REST Framework • PostgreSQL • Redis • RBAC

- Built microservices for campaign management & medical-machine allocation with **RBAC**, supporting **100+ concurrent field operations** across a multi-tenant healthcare platform.
- Replaced manual spreadsheet workflows with API-backed automation, improving data accuracy and efficiency **~35%** while eliminating allocation reporting errors.

TECHNICAL SKILLS

Languages: Python 3, SQL

Frameworks & APIs: Django, Django REST Framework (DRF), FastAPI, Flask, REST API Design, JWT, OAuth 2.0, Swagger/OpenAPI

Databases: PostgreSQL, Redis — Schema Design, Query Optimization, ORM Tuning, Composite & Partial Indexing

DevOps & Tools: Git, GitHub Actions (CI/CD), Docker, Linux, Postman, PyCharm, VS Code

Libraries & Async: Celery, Pandas, CSV/Excel Processing, Pytest, Unit Testing

Architecture: Microservices, Scalable Backend Design, OOP, Design Patterns, Performance Optimization

EDUCATION

B.Sc. Information Technology

2023

Sri Krishna College of Arts & Science, Bharathiyar University

GPA: 6.9 / 10.0

KEY ACHIEVEMENTS

- ~40% reduction** in operational overhead by automating payment & reporting workflows — zero manual entry at Aceassured.
- ~50% PostgreSQL query speed-up** via advanced ORM tuning and composite indexing on a live logistics platform.
- ~60% downtime reduction** by architecting and migrating a legacy monolith to a modern microservices stack.
- Scaled a multi-tenant healthcare backend to support **100+ concurrent field operations** with strict RBAC and data isolation.
